11.	Annexure-II – Infrastructure for On-Job Training	41
12.	Annexure-III - Guidelines for Instructors & Paper setter	42

1. ACKNOWLEDGEMENT

The DGT sincerely express appreciation for the contribution of the Industry, State Directorate, Trade Experts and all others who contributed in revising the curriculum. Special acknowledgement to the following industries/organizations who have contributed valuable inputs in revising the curricula through their expert members:

1. DET, Gujarat
2. Faculty of Technology, M. S. University, Vadodara
3. Akaaish Mechatronics, Vadodara
4. Amul Dairy, Anand, Gujarat
5. Technology Exchange, Ahmedabad
6. Festo India Pvt. Ltd, Santacruz Mumbai
7. Christioni Sharpline Tech Pvt. Ltd, Navi Mumbai.
8. Abvolt India Pvt Ltd, Vikroli Mumbai
9. Digitech Controls System Pvt. Ltd., Pune
10. Larson & Turbo, Pavai Mumbai

Special acknowledgement is extended by DGT to the following expert members who had contributed immensely in this curriculum.

Co-ordinator for the course: Shri L.K. Mukherjee, DDT and Shri S. A. Pandav, RDD, Vadodara & Surat, Gujarat

Sl. No.	Name & Designation Sh./Mr./Ms.	Organization	Remarks
1.	L.K.Mukherjee, DDT	CSTARI, Kolkata	Expert
2.	S. A. Pandav, RDD	Vadodara & Surat,Gujarat	Expert
3.	DK Sharma, MD	Technology Exchange	Expert
4.	M.V. Pillai, Principal	ITI Belapur, Govt. Dist Thane.	Expert
5.	Hemant.N. Bargal, Training Officer	DVET, Mumbai	Expert
6.	Heena Chandwani, Associate Prof.	Faculty of Technology, M. S. University, Vadodara	Expert
7.	Rakesh A. Pawar, Manager Maintenance	Akaaish Mechatronics	Expert
8.	Gaurand Patel, Manager	Akaaish Mechatronics	Expert
9.	Ravi Darji, Sr. Exe. HR	Amul Dairy, Anand	Expert
10.	K. C. Kachhadiya, Principal	ITI Karjan	Expert
11.	J. S. Parmar, Asst. App. Advisor	ITI Utarsanda	Expert
12.	Chandrashekhar V. Varorkar	Christioni Sharpline Tech Pvt. Ltd, Navi Mumbai.	Expert
13.	Ashish Kulkarni	Festo India Pvt. Ltd, Santacruz	Expert

		Mumbai	
14.	V. A. Kowshik	Festo India Pvt. Ltd, Santacruz Mumbai	Expert
15.	Ajit Gate	Digitech Equipments Pvt. Ltd., Pune	Expert
16.	Ilesh Shah	Abvolt India Pvt. Ltd., Vikroli Mumbai	Expert
17.	Pankaj shah	Larson & Turbo, Pawai Mumbai	Expert
18.	K.V. S. Narayana, TO	CSTARI, Kolkata	Expert

2. BACKGROUND

2.1 Apprenticeship Training Scheme under Apprentice Act 1961

The Apprentices Act, 1961 was enacted with the objective of regulating the programme of training of apprentices in the industry by utilizing the facilities available therein for imparting on-the-job training. The Act makes it obligatory for employers in specified industries to engage apprentices in designated trades to impart Apprenticeship Training on the job in industry to school leavers and person having National Trade Certificate(ITI pass-outs) issued by National Council for Vocational Training (NCVT) to develop skilled manpower for the industry. There are four categories of apprentices namely; **trade apprentice, graduate, technician and technician (vocational) apprentices.**

Qualifications and period of apprenticeship training of **trade apprentices** vary from trade to trade. The apprenticeship training for trade apprentices consists of basic training followed by practical training. At the end of the training, the apprentices are required to appear in a trade test conducted by NCVT and those successful in the trade tests are awarded the National Apprenticeship Certificate.

The period of apprenticeship training for graduate (engineers), technician (diploma holders and technician (vocational) apprentices is one year. Certificates are awarded on completion of training by the Department of Education, Ministry of Human Resource Development.

2.2 Changes in Industrial Scenario

Recently we have seen huge changes in the Indian industry. The Indian Industry registered an impressive growth during the last decade and half. The number of industries in India have increased manifold in the last fifteen years especially in services and manufacturing sectors. It has been realized that India would become a prosperous and a modern state by raising skill levels, including by engaging a larger proportion of apprentices, will be critical to success; as will stronger collaboration between industry and the trainees to ensure the supply of skilled workforce and drive development through employment. Various initiatives to build up an adequate infrastructure for rapid industrialization and improve the industrial scenario in India have been taken.

2.3 Reformation

The Apprentices Act, 1961 has been amended and brought into effect from 22nd December, 2014 to make it more responsive to industry and youth. Key amendments are as given below:

- Prescription of number of apprentices to be engaged at establishment level instead of trade-wise.
- Establishment can also engage apprentices in optional trades which are not designated, with the discretion of entry level qualification and syllabus.
- Scope has been extended also to non-engineering occupations.
- Establishments have been permitted to outsource basic training in an institute of their choice.
- The burden of compliance on industry has been reduced significantly.

3. RATIONALE

(Need for Apprenticeship in Technician Television & Audio System Trade)

A Technician Television & Audio system focuses on servicing of varieties of Television, Audio and Video devices and often responsible for the maintenance, installation, and operation of devices. Usually an entry-level position in this field requires only a high school, but more advanced positions often favor candidates who have higher education associated with AV technology, some form of vocational training, or relevant work experience.

Technicians are responsible for the installation, maintenance, setup, takedown and sometimes operation of equipment. Specific job duties and requirements vary depending on employer and job title, but normally familiarity with technology and equipment is more important than formal education for AV technicians. However, many vocational schools and community colleges offer training programs or associate's degree programs in audiovisual technology.

There are generally few formal education requirements for Television-audio technicians. Some employers only require that applicants to entry-level positions have a high school degree and the physical ability to lift equipment. More advanced positions often require skills in equipment maintenance, customer service, multimedia production and troubleshooting of TV, audio and video that are usually gained through previous work experience.

Some employers require prospective technicians to have experience with particular types of systems, and specialized experience or education may be required depending on the employer and the position.

4. JOB ROLES: REFERENCE NCO

Brief description of Job roles:

Electronics Fitter, General fits, assembles and repairs various kinds of electronic equipment in factory or workshop or at place of use. Examines drawings and wiring diagrams; checks parts for accuracy of fit and minor adjustments; assembles parts or mounts them on chassis or panels with aid of hand tools; installs and connects wiring, soldering joints equipment, diagnoses faults with aid of electronic testing equipment; dismantles equipment if required and replaces faulty parts or wiring.

Electronics Fitter, other include all other workers engaged in fitting, assembling, repairing and maintaining electronic equipment, machinery, appliances, etc., not elsewhere classified.

The Television & Audio technicians work in the electronics industry. They investigate problems customers have with their personal electronic devices and supply solutions..

The mechanic are also referred to as service technicians, are the troubleshooters of the TV and audio industry. They are asked to diagnose problems in electronics equipment such as televisions, video and audio disc players, radios, stereo components and video cameras. Often, TV and video repair technicians are specialists who are qualified to install and service devices like home security systems, satellite television dishes, intercom systems, and home entertainment systems.

Mechanic are responsible for setting up and operating audio and video systems, such as radio equipment, sound and video broadcast equipment and recording devices. They may install and configure specific systems for a manufacturing or sales company, install and maintain a wider variety of sound systems in an employer's facility, or set up and take down equipment in the field for concerts, weddings, speeches or other events.

The technicians' job duties may include connecting wires and cables and setting up and packing away sound boards, mixers, speakers, projectors, video screens and spotlights. After setup, technicians may also be responsible for running the machines they have set up. The technicians may be responsible for the permanent installation of items such as smart boards, large projectors, video feeds or computer networking systems.

Plan and organize assigned work and detect & resolve issues during execution. Demonstrate possible solutions and agree tasks within the team. Communicate with required clarity and understand technical English. Sensitive to environment, self-learning and productivity.

Reference NCO: 7243.10, 7243.40, 7243.45, 7243.50, 7243.70

5. GENERAL INFORMATION

1. **Name of the Trade** : **TECHNICIAN TELEVISION & AUDIO SYSTEM**
2. **N.C.O. Code No.** : **7243.10, 7243.40, 7243.45, 7243.50, 7243.70**
3. **Duration of Apprenticeship Training (Basic Training + Practical Training):** 2years

3.1 For Fresher's:- Duration of Basic Training: -

- a) Block –I : 3 months
- b) Block – II : 3 months

Total duration of Basic Training: 6 months

Duration of Practical Training (On -job Training): -

- a) Block–I: 9 months
- b) Block–II : 9 months

Total duration of Practical Training: 18 months

3.2 For ITI Passed: - Duration of Basic Training: - NIL

Duration of Practical Training (On -job Training): 12 months

4. **Entry Qualification** : Passed 10th Class under 10+2 System of Education or its equivalent
5. **Selection of Apprentices** : The apprentices will be selected as per Apprentices Act amended time to time.
6. **Rebate to ITI Passed out Trainees** : i) One year in the trade of Electronics Mechanic/ Mechanic Consumer Electronic Appliances
- ii) One Year who Passed one year BBBT and any one advanced module in CoE of Electronics sector.

Note: Industry may impart training as per above time schedule for different block, however this is not fixed. The industry may adjust the duration of training considering the fact that all the components under the syllabus must be covered. However the flexibility should be given keeping in view that no safety aspects is compromised.

6. COURSE STRUCTURE

Training duration details: -

Time (in months)	1-3	4-12	13-15	16-24
Basic Training	Block- I	-----	Block - II	-----
Practical Training (On - job training)	----	Block - I	-----	Block - II

Components of Training ↓	Duration of Training in Months →																								
	1	2	3	4	5	6	7	8	9	10	11	12	13	14	15	16	17	18	19	20	21	22	23	24	25
Basic Training Block - I	█	█	█																						
Practical Training Block - I				█	█	█	█	█	█	█	█	█													
Basic Training Block - II													█	█	█										
Practical Training Block - II																█	█	█	█	█	█	█	█	█	█

7. SYLLABUS

7.1 BASIC TRAINING (BLOCK - I & II)

DURATION: 06 MONTHS

GENERAL INFORMATION

- 1) **Name of the Trade** : **TECHNICIAN TELEVISION & AUDIO SYSTEM**
- 2) **Hours of Instruction** : 1000 Hrs. (500 hrs. in each block)
- 3) **Batch size** : 20
- 4) **Power Norms** : 3 KW
- 5) **Space Norms** : 56 sq. mtr.
- 6) **Examination** : The internal assessment will be held on completion of each Block.
- 7) **Instructor Qualification** :
 - a) B.E./B. Tech in Electronics/Electornics & Telecommunication/Electronics & Communication with one year expreience in the relevent field.

OR
 - b) Diplome in Elctronics/Electronics & telecommunication/Electronics & Communication from recognized board of technical education with two years experience in the relevent field.

OR
 - c) NTC/NAC in the trade with three years' experience respective in the relevent field.
- 8) **Tools, Equipments & Machinery required** : - As per Annexure – I

7.1.1 DETAIL SYLLABUS OF CORE SKILL

A. Block- I Basic Training

Topic No.	a) Engineering Drawing	Duration (in hours)	b) Workshop Science & Calculation	Duration (in hours)
1	<p>Engineering Drawing: Introduction and its importance</p> <p>-Viewing of engineering drawing sheets. Method of Folding of printed Drawing Sheet as per BIS SP:46-2003 Drawing Instruments : their Standard and uses</p> <p>- Drawing board, T-Square, Drafter (Drafting M/c), Set Squares, Protractor, Drawing Instrument Box (Compass, Dividers, Scale, Diagonal Scales etc.), Pencils of different Grades, Drawing pins / Clips.</p>	30	<p>Unit: Systems of unit- FPS, CGS, MKS/SI unit, unit of length, Mass and time, Conversion of units.</p>	20
2	<p>Lines :</p> <p>- Definition, types and applications in Drawing as per BIS SP:46-2003</p> <p>- Classification of lines (Hidden, centre, construction, Extension, Dimension, Section)</p> <p>- Drawing lines of given length (Straight, curved)</p> <p>- Drawing of parallel lines, perpendicular line</p> <p>- Methods of Division of line segment</p>		<p>Fractions & Simplification: Fractions, Decimal fraction, Multiplication and Division of Fractions and Decimals, conversion of Fraction to Decimal and vice versa. Simple problems Simplification using BODMAS.</p>	
3	<p>Drawing of Geometrical Figures: Definition, nomenclature and practice of -</p> <p>- Angle: Measurement and its types, method of bisecting.</p> <p>- Triangle -different types</p> <p>- Rectangle, Square, Rhombus, Parallelogram.</p> <p>- Circle and its elements.</p>		<p>Square Root : Square and Square Root, method of finding out square roots, Simple problem using calculator</p>	
4	<p>Lettering and Numbering as per BIS SP46-2003:</p> <p>- Single Stroke, Double Stroke,</p>		<p>Ratio &Proportion: Simple calculation on related problems.</p>	

	inclined, Upper case and Lower case.		
5	Free Hand sketch: Hand tools and measuring instruments used in electronics mechanics rades		Percentage: Introduction, Simple calculation. Changing percentage to decimal and fraction and vice-versa.
6	Free hand drawing : - Lines, polygons, ellipse, etc. - Geometrical figures and blocks with dimension. -Transferring measurement from the given object to the free hand sketches.		Material Science : Properties - Physical & Mechanical, Types – Ferrous & Non-Ferrous, difference between Ferrous and Non-Ferrous metals, introduction of Iron, Cast Iron, Wrought Iron, Steel, difference between Iron and Steel, Alloy steel, carbon steel, stainless steel, Non-Ferrous metals, Non-Ferrous Alloys.

B. Block- II
Basic Training

Topic No.	a) Engineering Drawing	Duration (in hours)	b) Workshop Science & Calculation	Duration (in hours)
1	Symbolic Representation (as per BIS SP:46-2003) of : - Fastener (Rivets, Bolts and Nuts) - Bars and profile sections - Weld, brazed and soldered joints. - Electrical and electronics element - Piping joints and fittings	30	Mass ,Weight and Density : Mass, Unit of Mass, Weight, difference between mass and weight, Density, unit of density, specific gravity of metals	20
2	Construction of Scales and diagonal scale		Work, Power and Energy: work, unit of work, power, unit of power, Horse power of engines, mechanical efficiency, energy, use of energy, potential and kinetic energy, examples of potential energy and kinetic energy.	
3	LED, IRLED, photo diode, photo transistor, opto-coupler symbols symbol of Logic gates		Algebra: Addition, Subtraction, Multiplication, Division, Algebraic formula, Linear equations (with two variables).	
4	Half adder, full adder, multiplexer and de-multiplexer		Mensuration: Area and perimeter of square, rectangle, parallelogram, triangle, circle, semi circle. Volume of solids – cube, cuboid, cylinder and Sphere. Surface area of solids – cube, cuboid, cylinder and Sphere.	
5	UJT, FET, MOSFET, DIAC, TRIC, SCR, IGBT symbols and circuits of FET Amplifier, SCR using UJT triggering, snubber circuit, light dimmer circuit using TRIAC, UJT based free running oscillator.		Trigonometry: Trigonometrical ratios, measurement of angles. Trigonometric tables. Finding height and distance by trigonometry.	

7.1.2 DETAIL SYLLABUS OF PROFESSIONAL SKILLS & PROFESSIONAL KNOWLEDGE

A. Block -I

Basic Training (03 Month)

Week No.	Professional Skills(275 Hrs.)	Professional Knowledge(120 Hrs.)
1.	<p>Importance of trade training, List of tools & Machinery used in the trade.</p> <p>Health & Safety: Introduction to safety equipments and their uses. Introduction of first aid, operation of Electrical mains.</p> <p>Occupational Safety & Health</p> <p>Importance of housekeeping & good shop floor practices.</p> <p>Basic safety introduction, Personal protective Equipments(PPE):- Use of Fire extinguishers.</p>	<p>Importance of safety and general precautions observed in the in the industry/shop floor. All necessary guidance to be provided to the new comers to become familiar with the working of Industrial Training Institute system including stores procedures. Soft Skills: its importance and Job area after completion of training.</p> <p>Introduction of First aid. Operation of electrical mains. Introduction of PPEs. Introduction to 5S concept & its application. Response to emergencies eg; power failure, fire, and system failure.</p>
2.	<p><u>Hand Tools and their uses</u></p> <ul style="list-style-type: none"> • Demonstration and uses of hand tools- screw drivers, pliers, tweezers, tester, wire stripper, electrician knife, steel rule, scribe, punches, hacksaw, hammer, files, bench vice and drilling machine. • Simple mechanical fixtures • Identification of types of screws, bolts, nuts, washers, rivets, clamps, connectors • Fix screws of different sizes on wooden boards • Cutting of wooden blocks using hand/hack saw • Simple fitting practice and drilling practice 	<p>Identification, specifications, uses and maintenance of commonly used hand tools.</p>
3.	<p>Basics of AC and Electrical Cables</p> <p>Identify the Phase, Neutral and Earth on power Socket.</p> <p>Use a Tester to monitor AC power.</p> <p>Measure the voltage between phase and ground and rectify earthing.</p> <p>Identify and test different AC mains cables.</p> <p>Skin the electrical wires /cables using the wire</p>	<p>Basic terms such as electric charges, Potential difference, Voltage, Current, Resistance. Basics of AC & DC. Terms such as +ve cycle, -ve cycle, Frequency, Time period, RMS, Peak, P-P, Instantaneous value. Single phase and Three phase supply. Terms like Line and Phase voltage/ currents. Insulators, conductors and semiconductor properties. Different type of electrical cables</p>

	<p>stripper and cutter. Prepare the mains cable for termination.</p>	<p>and their Specifications.</p> <p>Types of wires & cables, standard wire gauge (SWG).</p> <p>Classification of cables according to gauge (core size), number of conductors, material, insulation strength, flexibility etc.</p>
4.	<p><u>AC & DC measurements</u></p> <ul style="list-style-type: none"> • Identify the meter for measuring AC & DC parameters • Use the multi meter to measure the various functions (AC V, DC V, DC I, AC I, R) • Identify the different controls on the CRO front panel and observe the function of each controls • Identify the different controls on the function generator front panel and observe the function of each controls • Connect the function generator to CRO and observe the different wave forms 	<p>Introduction to electrical measuring instruments, Importance of meter, classification of meters, forces necessary to work a meter. MC and MI meter, range extension, need of calibration, characteristics of meters and errors in meters. Multi meter, use of meters in different circuits. Care and maintenance of meters. Use of CRO, Function generator, LCR meter</p>
5.	<p><u>Soldering & De-soldering and switches</u></p> <ul style="list-style-type: none"> • Identify different types of soldering guns and practice soldering of different electronic active and passive components and IC bases on lug boards and PCBs • Join the broken PCB track and test • Demonstrate soldering and de-soldering using soldering and de-soldering stations • Identify and use SPST, SPDT, DPST, DPDT, tumbler, push button, toggle, piano switches used in electronic industries 	<p>Different types of soldering guns, related to Temperature and wattages, types of tips. Solder materials and their grading. Use of flux and other materials. Selection of a soldering gun for specific requirement. Soldering and De-soldering stations and their specifications. Different switches and their specification, uses.</p>
6 & 7	<p><u>Passive Components</u></p> <ul style="list-style-type: none"> • Identify the different types of resistors • Measure the resistor values using colour code and verify the reading by measuring in multi meter • Verify ohms law • Measure the resistance, Voltage, Current through series and parallel connected networks using multi meter • Identify different inductors • Identify the different capacitors and measure capacitance of various 	<p>Ohm's law and its variables. Resistor-definition, types of resistors, their construction & specific use, color-coding, power rating. Equivalent Resistance of series parallel circuits. Distribution of V & I in series parallel circuits. KVL& KCL with applications.</p> <p>Principles of induction, inductive reactance, Capacitance and Capacitive Reactance,</p>

	<p>capacitors using LCR meter</p> <ul style="list-style-type: none"> • Dismantle and identify the different parts of a relay. • Connect a relay in a circuit and test for its working 	<p>Impedance. Types of capacitors, construction, specifications and applications. Dielectric constant. Significance of Series parallel connection of capacitors. Electromagnetic Relays, types, construction, specifications- coil voltage and contact current capacity.</p>
8 to 10	<p><u>Computer Hardware, OS, MS office Networking</u></p> <ul style="list-style-type: none"> • Identification of various indicators, Connectors, ports on the computer cabinet • Identify drives and their capacity. • Identify various connectors and cables inside the cabinet & Identify connections to rear side and front panel of the cabinet • Identify various parts of the system unit and motherboard • Configuring and troubleshooting display problems • Practice various features of OS • Install a Printer driver software and test for print outs • Install MS office software • Explore different Menu/Tool/Format/status bars of MS word and practice the options: Editing the text, saving the text, changing the font and size of text. • Prepare a power point presentation on any three known topics with various design features • Invoke excel sheet from MS WORD and vice versa • Identify the cables and network components. • Making UTP cross cables and testing, Making straight cables and testing, Making cable layout drawing 	<p>Basic blocks of a computer, Hardware and software, I/O devices, keyboard, types of mouse and their working, Different types of printers, their function and inter-connection and their advantages HDD, CDD, DVD. Various ports in the computer. POST Booting concept.</p>
11-12	<p><u>Electronic circuit simulation software</u></p> <ul style="list-style-type: none"> • Prepare simple digital and electronic circuits using the software • Simulate and test the prepared digital and analog circuits • Convert the prepared circuit into a 	<p>Study the library components available in the circuit simulation software. Various resources of the software.</p>

	layout diagram. <ul style="list-style-type: none">• Explore various troubleshooting and fault finding resources provided in the simulation software.	
13	Revision & Assessment / Examination (03 days)	

B. Block -II
Basic Training (03 Months)

Week No.	Professional Skills(275 Hrs.)	Professional Knowledge (120 Hrs.)
1-2	<p><u>Basic Gates and combination circuits</u></p> <ul style="list-style-type: none"> Identify different Logic Gates (AND, OR, NAND, NOR, X-OR, X-NOR, NOT ICs) by the number printed on them and draw I/O pin-out numbers. Verify the truth tables of all Logic Gate ICs by connecting switches and LEDs. Construct and verify the truth table of all the gates using NAND and NOR gates Use digital IC tester to test the various digital ICs (TTL and CMOS) Construct Half Adder/Full adder circuit and verify the truth table. Construct the Adder cum Subtractor and verify the result 	<p>Introduction to Digital Electronics.</p> <p>Difference between analog and digital signals, Logic families and their comparison, Logic levels of TTL and CMOS. Number systems (Decimal, binary, octal, Hexadecimal) BCD code, ASCII code and code conversions.</p> <p>Logic Gates and their truth tables.</p> <p>Combinational logic circuits such as Half Adder, Full adder, Parallel Binary adders, 2-bit and four bit full adders. Magnitude comparators. Half adder, full adder ICs and their applications for implementing arithmetic operations</p>
3-4	<p><u>Flip Flops and Counters</u></p> <ul style="list-style-type: none"> Identify different Flip-Flop (ICs) by the number printed on them Verify the truth tables of Flip-Flop ICs (RS, D, T, JK, MSJK) by connecting switches and LEDs Construct and test a four bit asynchronous binary counter using 7493. Construct and test synchronous Decade counter. Identify and test common anode and common cathode seven segment LED display using multi meter Display the two digit count value on seven segment display using decoder/driver ICs. Construct a shift register using RS/D/JK flip flop and verify the result Construct and test four bit SIPO register Construct and test four bit PIPO register Construct and test bidirectional shift registers 	<p>Introduction to Flip-Flop. S-R Latch, Gated S-R Latch, D- Latch. Flip-Flop: Basic RS Flip Flop, edge triggered D Flip Flop, JK Flip Flop, T Flip Flop, Master-Slave flip flops and Timing diagrams, Basic flip flop applications like data storage , data transfer and frequency division.</p> <p>Basics of Counters, types of counters, two bit and three bit Asynchronous binary counters and decade counters with the timing diagrams.</p> <p>Types of seven segment display, BCD display, BCD to decimal decoder. BCD to 7 segment display circuits.</p>

5	<p><u>Op – Amp & Timer 555 Applications:</u></p> <ul style="list-style-type: none"> • Use analog IC tester to test the various analog ICs • Construction and testing of various Op-Amp circuits Inverting, Non-inverting and Summing Amplifiers • Construct and test Differentiator and Integrator • Construct and test a zero crossing detector • Construct and test Instrumentation amplifier • Construct and test a Binary weighted and R-2R Ladder type Digital-to-Analog Converters. • Construct and test Astable timer circuit using IC 555. • Construct and test mono stable timer circuit using IC 555. • Construct and test VCO (V to F Converter) using IC 555. • Construct and test 555 timers as pulse width modulator. 	<p>Block diagram and Working of Op-Amp, importance, Ideal characteristics, advantages and applications.</p> <p>Schematic diagram of 741, symbol, Non inverting voltage amplifier, inverting voltage amplifier, summing amplifier, Comparator, zero cross detector, differentiator, integrator and instrumentation amplifier, other popular Op-Amps.</p> <p>Block diagram of 555, functional description w.r.t. different configurations of 555 such as mono stable, as table and VCO operations for various application</p>
6	<p>Fiber optic communication:</p> <ul style="list-style-type: none"> • Identify the resources and their need on the given fiber optic trainer kit • Make optical fiber setup to transmit and receive analog and digital data • Demonstrate FM modulation and demodulation using OFC trainer kit using audio signal and voice link • Demonstrate PWM modulation and demodulation using OFC trainer kit using audio signal and voice link • Demonstrate PPM modulation and demodulation using OFC trainer kit using audio signal and voice link 	<p>Introduction to optical fiber as a transmission media, its advantages over other media, properties of optic fiber, testing, losses, types of fiber optic Cables and specifications. Encoding of light.</p> <p>Fiber optic joints, splicing, testing and the related equipments/measuring tools, precautions to be taken laying of cables, safety aspects while handling optical cables.</p>
7-8	<p>SMPS:</p> <ul style="list-style-type: none"> • Dismantle the given stabilizer and find major sections/ ICs components. • Measure voltages at vital points. • Identify various input and output sockets / connectors of the given SMPS. • Apply input and measure outputs using a 	<ul style="list-style-type: none"> • Concept and block diagram of manual & automatic and servo voltage stabilizer, o/p voltage adjustment, voltage cutoff systems, study of different types of relays used in stabilizers, study of electronic circuit commonly used, buck and boost

	<p>multi meter.</p> <ul style="list-style-type: none"> • Test capacity of the given SMPS. • Identify major sections/ ICs/components of SMPS. • Measure / Monitor major test points of computer SMPS. • Identify and replace the faulty components. • Use SMPS used in TVs and PCs for • Practice • • Inverters, battery maintenance and UPS • Identification of front panel controls & indicators of inverter • Identification of back panel sockets & connections of inverter • Connect battery and load to inverter and test on battery load • Measure battery current & load current when inverter is working in battery mode • Open top cover of inverter, Identify isolator transformer & inverter transformer 	<p>concept. Block Diagram of Switch mode power supplies and their working principles</p> <ul style="list-style-type: none"> • Various types of chopper circuits step-up, step down, inverting types. • Introduction to DC-DC Converters • ICs used for converting DC- DC, block diagrams and their pin outs. Applications of DC-DC converters • The principle, operation, power rating and change over period of inverter. Block diagram of inverter. Installation of inverters, protection circuits used in inverters- battery level, over load, over charging etc. • Principle and working of three phase inverter circuits. • Installation of single phase & three phase inverters • Concept of UPS, Difference between inverters & UPS. Basic block diagram of UPS & operation principle of rectifier, battery, inverter, static transfer switch. • Types of UPS: OFF line UPS, ON line UPS, Line interactive UPS & their comparisons. UPS specification, load power factor & types of indications and protections.
9	<p>LCD and LED TV</p> <ul style="list-style-type: none"> • Identification and use of different Controls LCD/LED TV/SMART TV • Identify various connectors provided on a LCD TV and test the healthiness. • Dismantling the panel of LCD/LED TV • Identification of components and different sector of LCD / LED TV/SMART TV. • Dismantle, Identify the parts of the remote control • Trace and rectify the faults of a various remote controls • Identify various connectors and connect the 	<ul style="list-style-type: none"> • Difference between a conventional CTV with LCD/ LED and SMART TVs, • Principle of LCD/ LED & SMART TV and function of its different section. Basic principle and working of 3D TV. • IPS panels and their features • Different types of interfaces like HDMI, USB, RGB etc with latest TVs. • TV Remote Control –Types, parts and functions, IR Code transmitter and IR Code Receiver, Working principle, operation of remote control. Different adjustments, general faults in Remote

	<p>cable operator's external decoder (set top box) to the TV.</p> <ul style="list-style-type: none"> • LCD/ LED Projector • Identify various front panel controls on the given LCD/LED Projector and operate the projector using them • Identify rear connectors and terminate them using proper cables to the desktop computer • Make necessary adjustments of the display using remote • • Dismantle the projector and identify all major functional modules • Test the healthiness of power supply, exhaust fan etc. • Identify the LCD/LED lamp stack and monitor the necessary voltages 	<p>Control.</p> <ul style="list-style-type: none"> • Differentiate LCD and LED projectors. • Specifications of LED Projector • Working principle of LED Projector • Most frequently occurring faults in a LED projector and their remedies.
10	<p>DTH System</p> <ul style="list-style-type: none"> • Identification & use of DTH system assembly • Identification & use of different tools and equipments used in DTH installation procedure & cabling procedure • Identification of Various types of connectors and cables and • Connection procedure. • Install a DTH system & get a TV station • Site selection, installation mounting tracking for azimuth and elevation angles using SAT meter. • Identify the faults in DTH system & rectify • Identification & use of various I/O ports of STB • STB connection and first installation • Identify the faults in STB & rectify. 	<ul style="list-style-type: none"> • Basic satellite communication, Merits & Demerits of satellite communication, applications, types of satellite & its orbits, Satellite Frequency Bands. Basic components of DTH system: PDA, LNBC, Satellite receiver terminal, dish installation aspects, Azimuth & elevation settings of dish/ DTH receiver. Types of cables used in DZTH system, impedance and specification • Multi-dwelling unit design, headed amplifier, line amplifier, cascaded in/out multi-switch, tap, and splitter. Set top box features, block diagram of set top box, I/O ports, Cable modem termination system, software & customer premises equipment's.
11	<ul style="list-style-type: none"> • Sensors ,Transducers and Applications • Identify sensors used in process industries such as RTDs, Temperature ICs, Thermocouples, proximity switches (inductive, capacitive and photo electric), load cells, strain gauge. LVDT by their appearance 	<ul style="list-style-type: none"> • • Basics of passive and active transducers. • Role, selection and characteristics. • Working principles of RTD, PT-100 Thermocouple, Sensor voltage and

	<ul style="list-style-type: none"> • Measure temperature of a lit fire using a Thermocouple and record the readings referring to data chart. • Measure temperature of a lit fire using RTD and record the readings referring to data chart. • Measure the strain of a given material using strain gauge • Measure the DC voltage of a LVDT • Detect different objectives using capacitive, inductive and photoelectric proximity sensors 	<p>current formats.</p> <ul style="list-style-type: none"> • Thermistors – salient features – operating range, composition, advantages and disadvantages. • Thermocouples – basic principle – commonly used combinations, operating range, advantages and disadvantages. • Strain gauges – principle, gauge factor, types of strain gauges. • Load cell –definition, uses, working of strain gauge load cell • Principle of operation of capacitive transducers,- advantages and disadvantages • Principle of operation of inductive transducers,- advantages and disadvantages • Principle of operation of LVDT-its advantages and disadvantages • Proximity sensors – applications, working principles of eddy current , capacitive and inductive proximity sensors
12	<p>Home theatre</p> <ul style="list-style-type: none"> • Identification of different parts of home theatre • Testing of speakers, woofers& tweeters • Set up of home theatre using specific devices • Identification of different parts of AV receiver • Identify the faults in AV receiver & rectify 	<p>Introduction to Home theatre, surround sound system, basic components, block diagram of home theatre & working</p>
13	<p>CCTV</p> <ul style="list-style-type: none"> • Identification of different CCTV components • Draw, Trace or follow the CCTV setup of any commercial installation. • Identify the strategic locations for the installation of cameras. • Operate and learn the procedure for switching of cameras to have different views. • Identification of connectors and sockets used on DVRs 	<ul style="list-style-type: none"> • Types of cameras and their specifications used in CCTV systems. • CCTV Setup and its components Working of Digital Video Recorders and types of DVRs

	<ul style="list-style-type: none">• Test the healthiness cables and connectors.• Connect CCTV Cameras to DVR, Record and Replay.• Dismantle DVR and identify major functional blocks and test for the healthiness.• Take the students to any nearby commercial CCTV installation to carry out the above tasks.	
	Assessment / Examination (03 days)	

7.1.3 EMPLOYABILITY SKILLS

GENERAL INFORMATION

- 1) **Name of the subject** : **EMPLOYABILITY SKILLS**
- 2) **Applicability** : **ATS- Mandatory for fresher only**
- 3) **Hours of Instruction** : **110 Hrs. (55 hrs. in each block)**
- 4) **Examination** : **The examination will be held at the end of two years Training by NCVT.**
- 5) **Instructor Qualification** :

i) MBA/BBA with two years experience or graduate in sociology/social welfare/Economics with two years experience and trained in Employability skill from DGET Institute.

And

Must have studied in English/Communication Skill and Basic Computer at 12th /diploma level

OR

ii) Existing Social Study Instructor duly trained in Employability Skill from DGET Institute.

7.1.3.1 SYLLABUS OF EMPLOYABILITY SKILLS

A. Block – I Basic Training

Topic No.	Topic	Duration (in hours)
	English Literacy	15
1	Pronunciation : Accentuation (mode of pronunciation) on simple words, Diction (use of word and speech)	
2	Functional Grammar Transformation of sentences, Voice change, Change of tense, Spellings.	
3	Reading Reading and understanding simple sentences about self, work and environment	
4	Writing Construction of simple sentences Writing simple English	
5	Speaking / Spoken English Speaking with preparation on self, on family, on friends/ classmates, on know, picture reading gain confidence through role-playing and discussions on current happening job description, asking about someone's job habitual actions. Cardinal (fundamental) numbers ordinal numbers. Taking messages, passing messages on and filling in message forms Greeting and introductions office hospitality, Resumes or curriculum vita essential parts, letters of application reference to previous communication.	
	I.T. Literacy	15
1	Basics of Computer Introduction, Computer and its applications, Hardware and peripherals, Switching on-Starting and shutting down of computer.	
2	Computer Operating System Basics of Operating System, WINDOWS, the user interface of Windows OS, Create, Copy, Move and delete Files and Folders, Use of External memory like pen drive, CD, DVD etc. Use of Common applications.	
3	Word processing and Worksheet Basic operating of Word Processing, Creating, opening and closing Documents, use of shortcuts, Creating and Editing of Text, Formatting the Text, Insertion & creation of Tables. Printing document. Basics of Excel worksheet, understanding basic commands, creating simple worksheets, understanding sample worksheets, use of simple formulas and functions, Printing of simple excel sheets.	
4	Computer Networking and INTERNET Basic of computer Networks (using real life examples), Definitions of Local Area Network (LAN), Wide Area Network (WAN), Internet, Concept of Internet (Network of Networks), Meaning of World Wide Web (WWW), Web Browser, Web Site, Web page	

	and Search Engines. Accessing the Internet using Web Browser, Downloading and Printing Web Pages, Opening an email account and use of email. Social media sites and its implication. Information Security and antivirus tools, Do's and Don'ts in Information Security, Awareness of IT - ACT, types of cyber crimes.	
	Communication Skill	25
1	Introduction to Communication Skills Communication and its importance Principles of Effective communication Types of communication - verbal, non verbal, written, email, talking on phone. Non verbal communication -characteristics, components-Para-language Body - language Barriers to communication and dealing with barriers. Handling nervousness/ discomfort. Case study/Exercise	
2	Listening Skills Listening-hearing and listening, effective listening, barriers to effective listening guidelines for effective listening. Triple- A Listening - Attitude, Attention & Adjustment. Active Listening Skills.	
3	Motivational Training Characteristics Essential to Achieving Success The Power of Positive Attitude Self awareness Importance of Commitment Ethics and Values Ways to Motivate Oneself Personal Goal setting and Employability Planning. Case study/Exercise	
4	Facing Interviews Manners, Etiquettes, Dress code for an interview Do's & Don'ts for an interview	
5	Behavioral Skills Organizational Behavior Problem Solving Confidence Building Attitude Decision making Case study/Exercise	

B. Block- II
Basic Training

Topic No.	Topic	Duration (in hours)
	Entrepreneurship skill	15
1	Concept of Entrepreneurship Entrepreneurship- Entrepreneurship - Enterprises:-Conceptual issue Entrepreneurship vs. Management, Entrepreneurial motivation. Performance & Record, Role & Function of entrepreneurs in relation to the enterprise & relation to the economy, Source of business ideas, Entrepreneurial opportunities, the process of setting up a business.	
2	Project Preparation & Marketing analysis Qualities of a good Entrepreneur, SWOT and Risk Analysis. Concept & application of Product Life Cycle (PLC), Sales & distribution Management. Different Between Small Scale & Large Scale Business, Market Survey, Method of marketing, Publicity and advertisement, Marketing Mix.	
3	Institutions Support Preparation of Project. Role of Various Schemes and Institutes for self-employment i.e. DIC, SIDA, SISI, NSIC, SIDO, Idea for financing/ non financing support agencies to familiarizes with the Policies /Programmes & procedure & the available scheme.	
4	Investment Procurement Project formation, Feasibility, Legal formalities i.e., Shop Act, Estimation & Costing, Investment procedure - Loan procurement - Banking Processes.	
	Productivity	10
1	Productivity Definition, Necessity, Meaning of GDP.	
2	Affecting Factors Skills, Working Aids, Automation, Environment, Motivation How improves or slows down.	
3	Comparison with developed countries Comparative productivity in developed countries (viz. Germany, Japan and Australia) in selected industries e.g. Manufacturing, Steel, Mining, Construction etc. Living standards of those countries, wages.	
4	Personal Finance Management Banking processes, Handling ATM, KYC registration, safe cash handling, Personal risk and Insurance.	
	Occupational Safety, Health & Environment Education	15
1	Safety & Health Introduction to Occupational Safety and Health importance of safety and health at workplace.	
2	Occupational Hazards Basic Hazards, Chemical Hazards, Vibro-acoustic Hazards, Mechanical Hazards, Electrical Hazards, Thermal Hazards. Occupational health, Occupational hygienic, Occupational Diseases/ Disorders & its prevention.	

3	Accident & safety Basic principles for protective equipment. Accident Prevention techniques - control of accidents and safety measures.	
4	First Aid Care of injured & Sick at the workplaces, First-Aid & Transportation of sick person	
5	Basic Provisions Idea of basic provision of safety, health, welfare under legislation of India.	
6	Ecosystem Introduction to Environment. Relationship between Society and Environment, Ecosystem and Factors causing imbalance.	
7	Pollution Pollution and pollutants including liquid, gaseous, solid and hazardous waste.	
8	Energy Conservation Conservation of Energy, re-use and recycle.	
9	Global warming Global warming, climate change and Ozone layer depletion.	
10	Ground Water Hydrological cycle, ground and surface water, Conservation and Harvesting of water	
11	Environment Right attitude towards environment, Maintenance of in -house environment	
	Labour Welfare Legislation	5
1	Welfare Acts Benefits guaranteed under various acts- Factories Act, Apprenticeship Act, Employees State Insurance Act (ESI), Payment Wages Act, Employees Provident Fund Act, The Workmen's compensation Act.	
	Quality Tools	10
1	Quality Consciousness : Meaning of quality, Quality Characteristic	
2	Quality Circles : Definition, Advantage of small group activity, objectives of quality Circle, Roles and function of Quality Circles in Organization, Operation of Quality circle. Approaches to starting Quality Circles, Steps for continuation Quality Circles.	
3	Quality Management System : Idea of ISO 9000 and BIS systems and its importance in maintaining qualities.	
4	House Keeping : Purpose of Housekeeping, Practice of good Housekeeping.	
5	Quality Tools Basic quality tools with a few examples	

7.2 PRACTICAL TRAINING (ON-JOB TRAINING)

(BLOCK - I & II)

DURATION: 18 MONTHS (9 months in each block)

GENERAL INFORMATION

- 1) **Name of the Trade** : **TECHNICIAN TELEVISION & AUDIO SYSTEM**
- 2) **Batch size** : : a) Apprentice selection as per Apprenticeship Guidelines
b) Maximum 20 candidates in a group
- 3) **Examination** : i) The internal assessment will be held on completion of each block
ii) NCVT exam will be conducted at the end of 2nd year.
- 4) **Instructor Qualification** :
 - a. B.E./B. Tech in Electronics/Electronics & Telecommunication/Electronics & Communication with one year experience in the relevant field.
OR
 - b. Diplome in Electronics/Electronics & telecommunication/Electronics & Communication from recognized board of technical education with two years experience in the relevant field.
OR
 - c. NTC/NAC in the trade with three years' experience respective in the relevant field.
- 5) **Infrastructure for On Job Training** : - As per Annexure – II

7.2.1 BROAD SKILL COMPONENT TO BE COVERED DURING ON-JOB TRAINING

A. BLOCK – I

1. Safety and best practices (5S, KAIZEN etc.)
2. Record keeping and documentation
3. Identification and testing of electronic components/devices
4. Repair & Maintenance work

DURATION: 09 MONTHS (39 WEEKS)	
SL NO	LIST OF OPERATIONS/SKILLS TO BE COVERED DURING INDUSTRIAL TRAINING
1	Perform basic mechanical workshop operations using suitable tools for fitting riveting, drilling etc observing suitable care & safety.
2	<p>Test various electrical/electronic components using proper measuring instruments.</p> <ol style="list-style-type: none"> 1. Introduction to measuring instrument 2. Difference between MI Type and MC Type 3. Difference between analog & Digital Multimeter. 4. Use of analog & Digital Multimeter. 5. Introduction & use of front control of CRO. 6. Measuring Voltage, current, resistance using Multimeter. 7. Measurement of Voltage, current, Frequency and Phase angle using CRO 8. Introduction and use of Wattmeter.
3	<p>Configure, install, troubleshoot, upgrade, interconnect given computer system(s) and demonstrate & utilize application packages for different application.</p> <ol style="list-style-type: none"> 1. Safety precaution while handling pc internal component. 2. Introduction & use of various component used in pc 3. Demo on assembling of PC. 4. Motherboard connection. 5. Symptom of beep 6. Formatting of HDD 7. Installation of OS 8. Installation of Application Software. 9. Installation & Use of Antivirus. 10. Troubleshooting & Maintenance.
4	<p>Simulate and analyze the analog and digital circuits using Electronic simulator software.</p> <ol style="list-style-type: none"> 1. Introduction to simulation software 2. Introduction & use of all menu 3. Use of library.

	<ol style="list-style-type: none"> 4. Assemble circuit & test. 5. See the graphical result.
5	<p>Assemble, test and repair the various analog circuits and apply this knowledge to troubleshoot AF amplifier of PA system, fan regulator, light dimmer circuit, display systems, digital clock, digital timer and event counter.</p> <ol style="list-style-type: none"> 1. Identify the component given for assembly of above circuit. 2. Assemble the circuit with proper precaution. 3. Test the application circuit. 4. Repair, maintenance & troubleshooting the circuit.
6	<p>Assemble various electronic circuits using SMD components and test them using suitable test equipment and perform the repair work on the PCB tracks.</p> <ol style="list-style-type: none"> 1. Introduction to ESD belt. 2. Introduction to identify the SMD component. 3. Soldering concept of SMD, ie. Substrate, Solder paste Machine, component assembly (using pick & place machine), Reflow and Rework etc. 4. Testing of SMD assembled PCB using suitable test jig.
7	<p>Prepare, crimp, terminate and test various cables used in different electronics industries.</p> <ol style="list-style-type: none"> 1. Introduction to various connector/ Jack used in industry and their use. 2. Use of various crimping tools. 3. Crimping of RJ-11 and RJ 45 connector. 4. Crimping of straight and cross cable.
8	<p>Demonstrate the proficiency in the constructional features of AM/FM communication receiver circuits and devices and trouble shoot them.</p> <ol style="list-style-type: none"> 1. Introduction to AM/FM communication receiver. 2. Check the frequency response of AM/FM communication receiver. 3. Troubleshooting of AM/FM communication receiver.
9	<p>Dismantle, trouble shoot and replace the modules of a cell phone/smart phone and assemble.</p> <ol style="list-style-type: none"> 1. Introduction to cell phone/smart phone. 2. Identification of various parts used in cell phone/smart phone 3. Assembly of cell phone/smart phone. 4. Dismantle of cell phone/smart phone. 5. Software loading / Up gradation of software. 6. Configuration & Installation of various Application.

B. BLOCK – II

1. Safety and best practices (5S, KAIZEN etc.)
2. Record keeping and documentation
3. Identification and testing of electronic components/devices
4. Repair & Maintenance work

DURATION: 09 MONTHS (39 WEEKS)	
SL NO	LIST OF OPERATIONS/SKILLS TO BE COVERED DURING INDUSTRIAL TRAINING
1	Occupational Hazards and safety measures related to the trade. Introduction about environment and environment management system.
3	Installation, Operation, Maintenance and Troubleshooting Blue ray players
4	Installation, Operation, Maintenance and Troubleshooting Fibre optics cable.
5	Installation, Operation, Maintenance and Troubleshooting DJ Equipment, Mixer, Amplifier, DJ Headphones, Motorised Lighting, Lazer Pattern Lighting.
6	Installation, Operation, Maintenance and Troubleshooting Satellite Radio System: System Design, Satellite Radio Vs. Other Radio Formats
7	Installation, Operation, Maintenance and Troubleshooting DTH System, Terminology, Technology, Installations, Free & Commercial DBS Services, DTH Service Providers. Satellite Dish principle of operation, size, Systems design & types
8	Installation, Operation, Maintenance and Troubleshooting of digital Video Camera. Major Components, Modern Recording media, Other devices with video capturing ability. Digital Camcorders.
9	Installation, Operation, Maintenance and Troubleshooting of digital studio with transmitting, receiving and video conferencing facility.
10	Installation, Operation, Maintenance and Troubleshooting Domestic Appliances Microwave Oven, Washing Machines, Water Purifiers. Functions & their usage. Block Diagram. Testing & troubleshooting Security Systems: Various Types of Security Systems like Electronic Lock, Burglar Alarm, Biometrics, Closed Circuit Television, and Smart Cards etc. Features & Operation of Closed Circuit Television, Electronic Lock, Electronic Safe
11	Installation, Operation, Maintenance and Troubleshooting Computer Peripherals: Monitors, Mono/Colour Printers, Modem, Hard Disc, RAM, SMPS, Routers, Ethernet, Graphic Cards, Speakers, Wireless Keyboard and Mouse,
12	Installation, Operation, Maintenance and Troubleshooting of LED/SMART with remote control.

13	Installation, operation, maintenance and troubleshooting of setup box and dish TV.
14	Installation, operation, maintenance and troubleshooting of setup box, camera setup and CCTV.

8. ASSESSMENT STANDARD

8.1 Assessment Guideline:

Appropriate arrangements should be made to ensure that there will be no artificial barriers to assessment. The nature of special needs should be taken into account while undertaking assessment. Due consideration to be given while assessing for team work, avoidance/reduction of scrape/wastage and disposal of scarp/wastage as per procedure, behavioral attitude and regularity in training.

The following marking pattern to be adopted while assessing:

a) Weightage in the range of 60-75% to be allotted during assessment under following performance level:

For this grade, the candidate with occasional guidance and showing due regard for safety procedures and practices, has produced work which demonstrates attainment of an acceptable standard of craftsmanship.

In this work there is evidence of:

- Good skill levels in the use of hand tools, machine tools and workshop equipment
- Many tolerances while undertaking different work are in line with those demanded by the component/job.
- A fairly good level of neatness and consistency in the finish
- Occasional support in completing the project/job.

b) Weightage in the range of above 75%- 90% to be allotted during assessment under following performance level:

For this grade, the candidate, with little guidance and showing due regard for safety procedures and practices, has produced work which demonstrates attainment of a reasonable standard of craftsmanship.

In this work there is evidence of:

- Good skill levels in the use of hand tools, machine tools and workshop equipment
- The majority of tolerances while undertaking different work are in line with those demanded by the component/job.
- A good level of neatness and consistency in the finish
- Little support in completing the project/job

c) Weightage in the range of above 90% to be allotted during assessment under following performance level:

For performance in this grade, the candidate, with minimal or no support in organization and execution and with due regard for safety procedures and practices, has produced work which demonstrates attainment of a high standard of craftsmanship.

In this work there is evidence of:

- High skill levels in the use of hand tools, machine tools and workshop equipment
- Tolerances while undertaking different work being substantially in line with those demanded by the component/job.
- A high level of neatness and consistency in the finish.
- Minimal or no support in completing the project

8.2 FINAL ASSESSMENT- ALL INDIA TRADE TEST (SUMMATIVE ASSESSMENT)

SUBJECTS	Marks	Sessional Marks	Full Marks	Pass Marks	Duration of Exam.
Practical	300	100	400	240	08 hrs.
Trade Theory	100	20	120	48	3 hrs.
Workshop Cal. & Sc.	50	10	60	24	3 hrs.
Engineering Drawing	50	20	70	28	4 hrs.
Employability Skill	50		50	17	2 hrs.
Grand Total	550	150	700	-	

Note: - The candidate pass in each subject conducted under all India trade test.

9. FURTHER LEARNING PATHWAYS

On successful completion of the course,

- The trainees will be employed in reputed Industries / Organizations.
- On successful completion of the course trainees can opt for Diploma course (lateral entry).
{Applicable for candidates only who undergone ATS after CTS}

Employment opportunities:

On successful completion of this course, the candidates shall be gain fully employed in the following industries:

1. Various Television and Audio system Manufacturing Industries.
2. Consumer electronics and allied industries
3. Service industries
4. In public sector industries and private industries in India & abroad.
5. Self employment

TOOLS & EQUIPMENT FOR BASIC TRAINING
INFRASTRUCTURE FOR PROFESSIONAL SKILL & PROFESSIONAL KNOWLEDGE
TRADE: TECHNICIAN TELEVISION & AUDIO SYSTEM
LIST OF TOOLS & EQUIPMENTS FOR 20 APPRENTICES

A: TRAINEES TOOL KIT:-

Sl. No.	Name of the items	Quantity (indicative)
1.	Connecting screwdriver 100 mm	10 Nos.
2.	Neon tester 500 V.	6 Nos.
3.	Screw driver set (set of 5)	10 Nos.
4.	Insulated combination pliers 150 mm	6 Nos.
5.	Insulated side cutting pliers 150 mm	8 Nos.
6.	Long nose pliers 150 mm	6 Nos.
7.	Soldering iron 25 W. 240 V.	10 Nos.
8.	Electrician knife	6 Nos.
9.	Tweezers 100mm	10 Nos.
10.	Digital Multimeter (3 ½ digit)	10 Nos.
11.	Soldering Iron Changeable bits 10 W	6 Nos.
12.	De- soldering pump	10 Nos.

B: TOOLS INSTRUMENTS AND GENERAL SHOP OUTFITS.

Sl. No	Name of the items	Quantity (Indicative)
1.	Steel rule 300mm	4 Nos.
2.	Steel measuring tape-3 m	4 Nos.
3.	Tools makers vice 100mm (clamp)	1 No.
4.	Tools maker vice 50mm (clamp)	1 No.
5.	Crimping tool (pliers)	2 Nos.
6.	Magneto spanner set	2 Nos.
7.	File flat 200mm bastard	2 Nos.
8.	File flat 200mm second cut	2 Nos.
9.	File flat 200mm smooth	2Nos.
10.	100mm flat pliers	4 Nos.
11.	100mm round Nose pliers	4 Nos.
12.	Scriber straight 150mm	2 Nos.
13.	Hammer ball pen 0.5Kg	1 No.
14.	Allen key set (set of 9)	1 No.
15.	Tubular box spanner (set of 6Nos)	1 set.
16.	Magnifying lenses 75mm	2 Nos.
17.	Continuity tester	6 Nos.
18.	Hacksaw frame adjustable	2 Nos.
19.	Cold chisel 20mm	1 No.
20.	Scissors 200mm	1 No.

21.	Handsaw 450mm	1 No.
22.	Hand Drill Machine	2 Nos.
23.	First aid kit	1 No.
24.	Fire Extinguisher	2 Nos.
25.	Bench Vice	1 No.
26.	Dual DC regulated power supply 30-0-30 V, 2 Amps	4 Nos.
27.	DC regulated variable power supply 0-24 V, 1Amp	2 Nos.
28.	LCR meter (Digital)	1 No.
29.	CRO Dual Trace 20 MHz (component testing facilities)	2 Nos.
30.	Signal Generator, 0-100 KHz	2 Nos.
31.	Analog multimeter	2 Nos.
32.	Function generator (Triangular, square and sine wave)	2 Nos.
33.	Dimmer start 3 Amps	2 Nos.
34.	Op Amp trainer	2 Nos.
35.	Digital IC Tester	1 No.
36.	Computers in the assembled form (including cabinet, motherboards, HDD, DVD, SMPS, Monitor, KB, Mouse, LAN card, Blu-Ray drive and player), MS Office education version.	2 Nos.
37.	Laptops latest configuration	1 No.
38.	Laser jet Printer	1 No.
39.	INTERNET BROADBAND CONNECTION	1 No.
40.	Different types of Analog electronic components, digital ICs, power electronic components, general purpose PCBs, bread board, MCB, ELCB	As required
41.	SMD Soldering & De soldering Station with necessary accessories	1 No.
42.	Sensor trainer kit (containing Various sensors like Thermocouple, RTD, Thermocouple, load cell, strain gauge, LVDT, smoke sensors, speed sensor)	2 Nos.
43.	Simulation softwares packages	2 Nos
44.	Smart phone of different make 3G/4G enable	4 Nos
45.	Regulated power supply variable for cell phone repair	4 Nos
46.	LCD, LED, SMART TV trainer kit	1 No each
47.	AM/FM Commercial radio receivers	2 Nos
48.	Fibre optic communication trainer	2 nos
49.	SMPS trainer	1 No
50.	SMPS of different make	4 Nos
51.	PA system with amplifier	1 No
52.	LCD and LED TV	1 each
53.	CCTV set up	1 system
54.	LCD / LED Projector	1 No each
55.	DTH with accessories	2 sets
56.	Home theatre system	1 set

Note: In case of basic training setup by the industry the tools, equipment and machinery available in the industry may also be used for imparting basic training.

**INFRASTRUCTURE FOR WORKSHOP CALCULATION
& SCIENCE AND ENGINEERING DRAWING**

TRADE: TECHNICIAN TELEVISION & AUDIO SYSTEM

LIST OF TOOLS& EQUIPMENTS FOR 20 APPRENTICES

- 1) **Space Norms** : 45 Sq. m.(For Engineering Drawing)
2) **Infrastructure:**

A: TRAINEES TOOL KIT:-

Sl. No.	Name of the items	Quantity (indicative)
1.	Draughtsman drawing instrument box	20 Nos.
2.	Set square celluloid 45 ⁰ (250 X 1.5 mm)	20 Nos.
3.	Set square celluloid 30 ⁰ -60 ⁰ (250 X 1.5 mm)	20 Nos.
4.	Mini drafter	20 Nos.
5.	Drawing board (700mm x500 mm) IS: 1444	20 Nos.

B: FURNITURE REQUIRED

Sl. No.	Name of the items	Quantity (indicative)
1	Drawing Board	20 Nos.
2	Models : Solid & cut section	as required
3	Drawing Table for trainees	as required
4	Stool for trainees	as required
5	Cupboard (big)	1 No.
6	White Board (size: 8ft. x 4ft.)	1 No.
7	Trainer's Table	1 No.
8	Trainer's Chair	1 No.

INFRASTRUCTURE FOR ON-JOB TRAINING

TRADE: TECHNICIAN TELEVISION & AUDIO SYSTEM

For Batch of 20 APPRENTICES

Actual training will depend on the existing facilities available in the establishments. However, the industry should ensure that the broad skills defined against On-Job Training part (i.e. 9 months + 9 months) are imparted. In case of any short fall the concern industry may impart the training in cluster mode/ any other industry/ at ITI.

GUIDELINES FOR INSTRUCTORS AND PAPER SETTERS

1. Due care to be taken for proper & inclusive delivery among the batch. Some of the following some method of delivery may be adopted:

- A) LECTURE
- B) LESSON
- C) DEMONSTRATION
- D) PRACTICE
- E) GROUP DISCUSSION
- F) DISCUSSION WITH PEER GROUP
- G) PROJECT WORK
- H) INDUSTRIAL VISIT

2. Maximum utilization of latest form of training viz., audio visual aids, integration of IT, etc. may be adopted.

3. The total hours to be devoted against each topic may be decided with due diligence to safety & with prioritizing transfer of required skills.
